DETAILED ACTION

Due to the complex nature of the claims no request for an oral election is being made. Please see MPEP 812.01.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2 and 14-18 drawn to a polypeptide having protease activity and methods of using said polypeptide classified in class 530, subclass 300.
 - II. Claims 20-49 drawn to a peptide inhibitor, pharmaceutical compositions and uses thereof, classified in 530, subclass 330.
 - III. Claims 3-13, 19, drawn to DNA sequences, vectors containing said sequences and methods of using said vectors, classified in class 935, subclass 2+.
2. The inventions are distinct, each from the other because of the following reasons:
3. Groups I, II and III are patentably distinct inventions because the peptides of Groups I and II and the DNA sequences of Group III are chemically and structurally distinct products.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. This application contains claims directed to the following patentably distinct species of the claimed invention: claims drawn to a method for improving wound healing, a method for treating arthritis, a method for treating autoimmune diseases, a method for reducing the detrimental side effects of radiation treatment, all of which use the peptide

of claim 1. If Group I is elected, Applicant is requested to elect one of the foregoing method claims that uses the peptide of claim 1.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
